ABOUT FF TISA REGULAR

Slovenian designer Mitja Miklav i drew FF Tisa to meet the technological and aesthetic requirements of modern magazine use. His primary goal was to develop a softer, more dynamic version of a nineteenth-century slab serif wood type. A large x-height and pronounced serifs make FF Tisa extremely legible in text sizes; its unique design details, including slightly exaggerated ink traps and a fairly upright italic, are evident in display applications. The typeface was selected by the TDC judges for a Certificate of Excellence in Type Design in 2007.

ABOUT MITJA MIKLAVCIC

Mitja Miklav i , born 1978, is a graphic and typeface designer. After working a few years for advertising agencies and design studios in Slovenia he moved to the UK where he studied MA in Typeface Design at the University of Reading. In 2006 he completed the course with distinction. In 2007 he received the TDC Certificate of Excellence in Type Design. Mitja now runs his own studio, specialised in typeface design, information architecture, branding and editorial design; among others he collaborates with well-known type foundries in the United States and Europe.
